### PROFESSIONAL SUMMARY

Backend developer with 2+ years hands-on experience Designing and delivering production-grade API and Microservices using Node.js, Typescript, NestJS, and PostgreSQL. Skilled at building secure, high-performance Services, integrating payment and authentication, and shipping containerised applications with CI/CD. Focused on reliable, maintainable Systems and close collaboration with product and frontend teams.

### EXPERIENCE

#### **StartHub Innovation — Backend Developer June 2024 – October 2024**

- Contributed to Servicom (artisan marketplace): implemented backend endpoints for user and artisan onboarding, job creation, and job history.
- Built APIs supporting location-based artisan discovery and job tracking.
- Implemented verification and rating flows; designed database models to record job metrics and histories.
- Collaborated with frontend and DevOps to deploy features and improve request reliability.

#### **Govic Resource — Backend Developer Dec 2024 – Apr 2025**

- Designed and implemented backend APIs and database integrations to enable customer orders and product sales.
- Built order management endpoints, payment integration stubs, and admin reporting routes.
- Focused on production stability, bug fixes, and handover documentation.

#### **Freelance — Backend Developer Apr 2025 – Present**

- Deliver RESTful APIs and small microservices for startups: authentication, order flows, payment hooks, and admin APIs.
- Use Docker and GitHub Actions for builds and deployment pipelines.
- Maintain and extend portfolio projects to demonstrate coding standards and architecture.

### SELECTED PROJECTS

WorkHub — Distributed job engine (NestJS, gRPC, PostgreSQL). ([github.com/jordanpet/workhub](https://github.com/jordanpet/workhub))

Food Marketplace API — Production-ready NestJS backend (user, cart, payment, order). ([github.com/jordanpet/foodapi](https://github.com/jordanpet/foodapi))

ChatApi — Real-time chat (Express, MongoDB, Socket.IO). ([github.com/jordanpet/expressjs\\_chatApi](https://github.com/jordanpet/expressjs_chatApi))

E-Commerce Cart Service — Cart + payment microservice. ([github.com/jordanpet/FoodHub](https://github.com/jordanpet/FoodHub))

### TECHNICAL SKILLS

Node.js, TypeScript, NestJS, Express.js, JavaScript, REST, GraphQL, gRPC, JSON,

PostgreSQL, MySQL, MongoDB,  
Redis, Prisma, Docker, Git, GitHub Actions (CI/CD), basic Kubernetes, AWS (S3),  
Stripe / Paystack integrations, JWT,  
OAuth2, bcrypt, Helmet.js, Jest, Postman, Swagger/OpenAPI

### **EDUCATION & TRAINING**

B.Sc., Geology — Akwa Ibom State University (2017–2022)

StartHub Innovation — Web & App Development (coursework) — January 2024 —  
June 2024

Node.js: Microservices — Udemy (2024)

Backend Development with Node.js & Express — Coursera (2024)
